PERSONAL PROJECTS

Social Media Application (05/2023 - 05/2023)

- Developed and implemented a social media application from scratch, allowing users to create profiles, view and interact with posts, update their profiles, create new posts, and delete their accounts.
- Implemented a user-friendly interface for seamless navigation and enhanced user experience, resulting in increased user engagement and retention.

Multi-Language website (02/2022 - 06/2022)

- Developed a dynamic content translation mechanism that automatically translates website content based on the selected language
- Localized the user interface elements of the website, including menus, buttons, labels, and error messages, to match the selected language.
- Implemented a flexible layout system to accommodate different text lengths and ensure a visually appealing user interface across languages.

News Application (10/2021 - 01/2022)

- The application aggregates news articles from different websites and presents them in a unified and organized manner.
- Users can customize their news preferences and filter search results based on criteria such as date, relevance, or source.
- The application features a clean and intuitive user interface, allowing for easy navigation and effortless news browsing.
